

IWSDUAL8 In-Wall Subwoofer

When paired with a great subwoofer amplifier, this passive in-wall subwoofer delivers the ideal amount of bass. (Note: We recommend pairing it with OSD Audio's SMP300, a 4-ohm stable dedicated subwoofer amplifier that matches this subwoofer's 4-ohm impedance specification.) Capable of handling up to 300 watts of power, the IWSDual8 includes dual 8" long excursion graphite woofers. Graphite woofers produce punchy yet incredibly realistic sound, while the dual woofer configuration works in tandem to enhance the soundstage. You'll experience a wider range of sound and sonic nuances like never before! The flush-mount design includes a thin bezel that virtually disappears into interiors, and the grille is held securely in place with two Neo magnets.

IWSDUAL8

Passive In-Wall Subwoofer
Dual 8" Long Excursion Graphite Cone Woofer
Power Handling: 300 Watts
Freq Response: 28 - 120Hz
Sensitivity: 95dB 1W/1m
Impedance: 4 Ohm
