

TREVOCE12 EQ DSP Triple Subwoofer

The additional upgrades we have made make this the best all-round sub in our history. Incorporated in the Trevoce12 EQ DSP is the new native EQ, and the iWoofers DSP engine. The native EQ has allowed us to extract the maximum bass extension possible from our design. This allows the full range of musical instruments and special effects to be reproduced. Configured with a single active woofer and two symmetric built passive woofers. The active subwoofer is self-contained and uses the sub's amplifier to reproduce sound while the two passive symmetric-built woofers to dramatically enhance the SPL.

TREVOCE12 EQ DSP

- 12" Triple Powered Subwoofer
- Built-In DSP with App Control
- Power: 800W Dynamic
- Active Woofer: 12"
- Passive Woofers: Dual 12"
- Phase Control: 0-180°
- Inputs: Hi Level / Low Level / LFE
- Dual Voltage: 100/120V - 220/240V
- Freq Response: 18Hz - 160Hz
- Dimensions: 16 x 15.4 x 15 in
